

In the Specification:

The paragraph beginning at page 9, line 4 has been amended as follows:

The double wing current collector 12 of Fig. 2 is essentially comprised of two current collector portions, both having the numerical designation 14 and 12A and 12B, each similar to current collector 10 of Fig. 1 as mirror images of each other. The mirror image current collectors 14 12A, 12B are positioned side-by-side connected together at a tab 18 18A.
